Around 500 exhibitors will showcase their collections this July, with a predominant presence of European manufacturers (98% of the exhibitors coming from Europe and Turkey).

The Future Fabrics Expo: TLTF new section dedicated to sustainable fabrics in partnership with Sustainable Angle.

The London Textile fair invited the Future Fabrics Expo as part of its vision to help guide designers and brands in their journey towards more sustainable fabric sourcing and practices. This new project reflects a timely recognition of the critical need for the fashion and textile industries to start practising sustainability through sourcing, at the very fibre and fabric stage.

The Future Fabrics Expo is located within the Auditorium (Gallery Level), for further information please have a look here: <http://thelondotextilefair.co.uk/sustainableangle/>
